PNEUMONIA VACCINES FOR ADULTS

CDC recommends pneumococcal vaccination for adults 50 years or older.

The Division of Health will provide the Prevnar 20 vaccine to residents age 50+ who have not had a previous pneumonia vaccine. Contact us today!

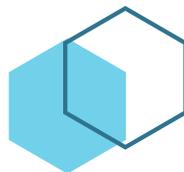

609-890-3884

HamNurse@HamiltonNJ.com

Talk to your healthcare provider if you have questions about getting the pneumonia vaccine, including:

- Adults younger than 50 with underlying conditions
- Adults 65+ who have had previous pneumonia vaccines
